

TERAFLOAT

by Swissvet 

LIGHT-WEIGHT PERFECTION

Light weight
Battery powered
Water resistant
Maintenance free
Swiss made

Built-in LED Lights

Flexible shaft & rotating head

Interchangeable burrs

Variable speed trigger

T-0100: Motor: The Terafloat uses a 12V Milwaukee motor with a variable speed trigger. The motor features an electronic shut-off protection when the grinding disk is blocked. The motor is fitted with powerful M12 Li-ion batteries, (standard 2.0Ah or optional 4.0Ah), and it has a LED light indicator for the remaining charge of the batteries. The basic sets use a single battery charger and the standard set a four-bay charger. A dual wall/car charger is available.

T-0154: Shaft: The shaft is light weight with three built-in LED lights to illuminate the horse's mouth during floating. The light stays on for five seconds after the trigger has been released to further examine the oral cavity. The shaft has a patent pending Turnflex® mechanism that allows the shaft to be straight or in a 6 degree flexed position.

T-0180: Head: The head can be rotated in 90 degree increments. The head is easily changed and the grinding burrs and disks are interchangeable. Five different grinding disks and grinding burrs are available. The head is water resistant and maintenance free. No lubrication is needed.

T-0005U: Terafloat basic set: Milwaukee 12V motor, 2.0 Ah batteries (2x), single charger 220V with UK plug, one turnflex® shaft, one head with rotary disc T2 (or apple core burr A2), and long carrying case or carrying bag.

T-0008U: Terafloat basic plus set: Milwaukee 12V motor, 2.0 Ah batteries (2x), single charger 220V with UK plug, one turnflex® shaft, one head with rotary disc, one head with apple core burr and long carrying case or carrying bag.

T-0011U: Terafloat standard set: Two Milwaukee 12V motors, 2.0 Ah batteries (4x), four-bay charger 220V with UK plug, two turnflex® shaft, one head with rotary disc, one head with apple core burr and large carrying case.

T-0202 Grinding disk coarse (T2)
 T-0212 Apple core burr (A2)

T-0221 Cylindrical burr large (Z1)
 T-0261 Diastema burr conical short (F1)

T-0262 Diastema burr cylindrical long (F2)
 T-0123 Milwaukee extended battery (4Ah)

T-0129U Charger 4 bay, 220V with UK plug
 T-0306 Transport bag (for basic sets only)

Designed and manufactured in Switzerland — Assembled in the USA
